**Metro Offices and Officescape, Inc. Partner to Deliver State of The Art Technology and Work Place Solutions to DC area Government, Corporate and Entrepreneurial Communities**

Washington, DC -- June 24, 2010 -- Metro Offices and Officescape, Inc. announced today, an exclusive partnership that will transform the Metropolitan Washington, DC area with innovative workplace solutions to enhance productivity, address metro area congestion and offer new employment opportunities for the areas distributed workforce. Specifically, this collaboration combines the leading global provider of telework technology complemented with the most successful workplace solutions provider in the DC Metro area -- to the federal government, commercial clients, and entrepreneurs. The combination of state-of-the-art technology and physical office space allows for work anytime, anywhere, securely and reliably; all while maximizing the efficiency and use of real estate space as needed.

Metro Offices has been providing in-office, virtual, and blended workplace, offices space in Washington, DC. Officescape is the leading telework company in the world with over 15 years of experience and expertise in telework management. Officescape provides telework services to over 65,000 end users and are employed by a variety of companies worldwide. This partnership will change the way people do business -- with a first of its combination of the most experienced DC Office Space provider and the proven telework technology of Officescape.”

”Throughout our history, Metro Offices has always provided our clients with the latest technology and services to succeed in a competitive marketplace,” says Kathlene Buchanan, president of Metro Offices. “New Technology exists today that can dramatically reduce the cost of providing workplace solutions for employees. Metro Offices is excited about this partnership with Officescape. We can now exclusively offer state-of-the-art workplace solutions that combine teleworking technology with physical office space to cost effectively meet the needs of any type of organization. Our focus is to assist organizations of all sizes, including the federal government, to take advantage of the fundamental changes in the workplace.”

“As companies seek new ways to maximize productivity, security, and mobility while providing a better quality of life for their workforce, Officescape is pleased to partner with Metro Offices to provide technology and space solutions that meet these needs,” says Felix Tan, president of Officescape.

The uncertainty in the economy and job market has professionals, entrepreneurs, contractors and small business owners turning to Metro Offices for creative solutions, coaching, advice and real knowledge base, as how to set-up and operate a small business and a virtual corporation. Metro Offices' timely new advancements afford the work force an opportunity to function in an efficient, professional work space, out of one's home, or from one Metro Offices' eight different locations. Traffic and congestion in the metropolitan area can be significantly relieved by government and corporate changes through location flexibility. With the expansion of the federal government and contractors in the Washington, DC area, serviced offices, telework and FlexDesks have become the ideal alternative to traditional offices. Working from a serviced office space, telework and FlexDesk is an ideal solution for the government and contractors that provides maximum flexibility and a professional work environment without the cost associated with long term office leases and the proper infrastructure.
